Art Unit: 1614

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-7, drawn to a method of preventing MMP induction in human skin comprising applying one or more substance that block UVB radiation in the range of about 215-315nm and block UVA radiation in the range of about 365-395nm.
 - Il Claims 8-10, drawn to a method of manufacturing a sunscreen by determining the absorbance of a candidate compound.
 - III. Claims 11-18, drawn to a method of treating fibrotic skin condition comprising providing a source of radiation emitting in a wavelength selected from UVB of 295-315, IVA>360-400nm, and a combination thereof; and illuminating the affected area with radiation.
- 2. Inventions I or III, and II are related as process of using and process of making the product. The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using (MPEP § 806.05(i)).
- 3. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

Application/Control Number: 09/900,535

Art Unit: 1614

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as and the search required for each group is not same, wherein a reference which anticipates the invention of Group I would not render the invention of Group II or III obvious, absent ancillary art, restriction for examination purposes as indicated is proper. Even if there were unity of classification, the search of entire groups and/or genus in the non-patent literature(especially, non-patent literature) and database search (a significant part of a thorough examination) would be burdensome, it is undue burden for examiner for the accurate and proper examination, restriction for examination purposes as indicated is proper.
- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vickie Kim whose telephone number is 703-305-1675. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel can be reached on 703-308-4725. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-3165 for regular communications and 703-746-3165 for After Final communications.
